For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: ANGLED HEEL/SHOES/LOW-FRICTION COALESCENT DANCE SHOES

(57) Abstract: A heel for a shoe includes a first relatively flat surface for contacting the ground when one is walking while wearing a shoe having the heel and a second relatively flat surface for contacting the ground when one is dancing and wearing a shoe having the heel. A pair of shoes can have one or two such heels. Preferably, there is a lower-friction portion on the second relatively flat surface. The second relatively flat surface allows one to relatively easily spin while dancing, as compared to dancing with shoes having normal heels.
